

## **intuVision VA Version 10.0 is here!**

---

We are pleased to introduce the benchmark intuVision VA release, 10.0!

This release marks our **renewed focus on enhanced user experience** – featuring new tools to allow for faster deployment and easier monitoring and management of the system.

Version 10.0 includes **failover mechanisms for analytics processing** to ensure uninterrupted operation of large distributed deployments of intuVision VA. Our **Remote Monitoring Tool** can now handle multiple servers to confirm you are always up and running.

New **classification feedback learning from detected events** makes updating and optimizing your trained classification that much easier. As detected events come in, you can use them to improve classification models to ensure the best results possible – or even to create an all new event!

**All new traffic tools** support reporting vehicle counts or speeds by lane and by classification types – meaning you can have lane-based and classification-separated counts by adding just one count event. Tied in to our new **night-time vehicle detector**, accurate traffic counts can be delivered night or day.

### **The new features available in intuVision 10.0 include:**

- Failover mechanism for analytics processing
- Enhanced remote monitoring tool for handling multiple servers
- Classification feedback learning from detected events
- Editable classification types for event review
- Streamlined new camera addition, enabling/disabling camera processing
- New event types and options – including a new **No Activity** event in the Security Module
- Updated event export to PDFs to include event markup overlays
- Processing and event review speedups

For more information about our products, please visit our website at [www.intuvisiotech.com](http://www.intuvisiotech.com), email us at [sales@intuvisiotech.com](mailto:sales@intuvisiotech.com) or call us at 781-497-1015.

This software upgrade is available free of charge to customers within their maintenance periods. Email or call to get a quote or learn more.
